**MONTA** provides your business a tailored, central solution suited to meet the ever-changing requirements that the modern EV driver and your business may have. Offer both a simple charging

and user experience on your premises whilst opening up an additional revenue stream and reducing CO2 emissions.

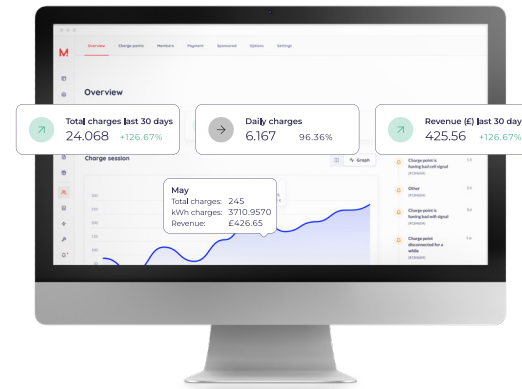

EV drivers using Monta Charge  
**200 000+**

Charges with Monta  
**2M**

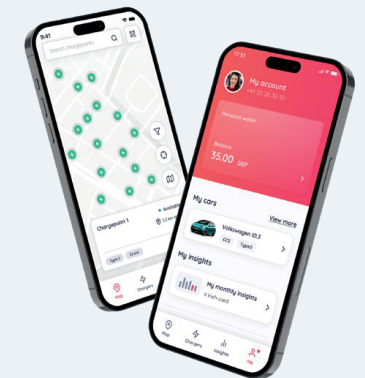

Successful charging rate  
**95%**

Roaming charge points  
**500 000**

### The leading EV charge command centre

**MONTA** Hub is a fully customisable, scalable and easy to use, OCPP backoffice platform, allowing state of the art, legacy free management and operation of your charge points, users, vehicles and finances, all from a singular central point.

## Monta Charge

THE BEST EV CHARGING EXPERIENCE FOR EV DRIVERS

**MONTA** Charge empowers end users to stay in control and enhance their own charging experience, no matter where.

## MONTA Product Features

### Set different pricing

Manage chargepoints on an Individual level and decide pricing for different groups.

### Public & private

Reserve chargepoints for members during peak hours. Open chargepoints to the public off peak hours.

### Smart queue

Reserve a chargepoint to make sure you're not driving to occupied chargepoints. Once a chargepoint is reserved, only you can start it.

### Smart booking

Reserve a chargepoint to make sure you're not driving to occupied chargepoints. Once a chargepoint is reserved, only you can start it.

### Car integration

Integrate your car with Monta to see the current battery level, whether the cable is plugged in or if your car is being charged.

### Payment options

Pay with Google Pay, Apple Pay, credit card, team wallet or charge key.

### EV Roaming

Chargepoints connected to Monta are available on many other EV charging apps. Attract more drivers by being available where EV drivers are.

### Chargepoint customisation

Customise your chargepoint settings to suit your needs; choosing who can access the chargepoints, and at what price.

### Self-healing algorithms

Self-healing algorithms ensure charger stability and availability. Self-healing automatically fixes CP bugs and errors.

### Dynamic pricing

Allows operators to set their kWh price based on the hour-by-hour price that they're paying for electricity, and not on a statistic number.

### Scheduled pricing

Schedule price changes that automatically occur at specific hours. This helps avoid losing money when electricity is expensive.

### Charge on the road

Get access to more than 260,000 publicly available chargepoints and pay with your preferred payment option.

### Scalable solution

Add or remove chargepoints and users through our platform. You can scale up and down as you please.

### Scheduled access

Reserve chargepoints for members during peak hours. Open chargepoints to the public off peak hours.

### Segment users

Control members, guests and other EV drivers' chargepoint access and usage.

### Member fees

Apply a monthly fee to be part of a team. Each member must pay this, in order to charge at the team's price.

### Smart charging

Set chargepoint to only charge at times when conditions are met, such as low electricity price, low CO2, or high amount of renewable energy.

### Load balancing

Static, Dynamic or True Dynamic options to distribute the electricity in a smart way. No need to buy expensive extra ampere.

### Sponsored chargepoint

Employees can charge at home on their company account, thereby avoiding the need to receive money on slow intervals.

\*Certain features are exclusive to paid subscribers.

# MONTA

Simple to use!

- Controlled via Monta App
- Plug and charge
- Monetized via Monta App
- RFID

## Commercial

**MONTA** allows you to open your business premises to new customers and offer existing customers a simple, easy to use charging experience. Open up an additional revenue stream by listing your charge points on their nationwide network.

## Workplace - Fleet

**MONTA** ensures your business complete autonomy and control, providing a streamlined, time saving resource to effectively manage all charging requirements of your employees, fleet and visitors.

### Future proven, to save and charge smarter

**MONTA** presents a fully scalable, adaptable hub capable of catering to both the current and future requirements of your business.

- Accessibility schedule options, opening an additional revenue stream
- Add new charge points, invite employees and create teams with custom tariffs with ease, in minutes.
- Real insights based on charging patterns, to help reduce costs and CO2 emissions with Smart Charge
- Sponsored charging. Create your own agreement, partner with Allstar or Mestro, and reimburse your employees when charging at home

### A truly real solution, to keep your EV fleet moving

**MONTA** assists with removal of range anxiety and charging delays, to guarantee your fleet is ready to go, when your drivers need it to be.

- Support zero emission fleets of any size and type
- With over 350+ integrations, on-board your vehicles for access to information such as state of charge, battery size, charge percentage, location and much more
- Priority vehicle and load balancing options
- Assign vehicles to specific users and user groups

## Multi-dwelling

**MONTA** makes it easy for housing communities, managing agents and developers to benefit alike. Increase property value whilst simultaneously operating an effortlessly maintained, cost effective service no matter the size of your community.

## Increase resident satisfaction, with minimal fuss

- Private or Public accessibility. Assign charge points to specific users/plots with adhoc provisions for visitors

**The Monta app is 100% free with no subscription cost when charging at home**

## Transparent & flexible pricing

**MONTA** is the software you need to get the most out of your chargepoints. Get started for free with up to 3 chargepoints or manage thousands via our web portal.

\* Transaction fee when people pay to charge on your chargepoint (ex. VAT)

1. Only for admin / owners of teams / operators
2. This Smart queue feature enables EV drivers to join the virtual queue at one of

multiple charging sites and allows drivers to get notified when the chargepoint becomes available for them

3. Load balancing is the distribution of power between the different points of consumption. In other words, Mont

automatically divides the available power over the vehicles that are charging

4. Member fees, select chargepoints access
5. In your teams wallet you can see the transactions from and to the wallet and

export the list of all the transactions

6. Relevant for companies reimbursing its employees for charging at home
7. Enterprise security features: audit log, ip whitelist, 2factor /saml
