

SYNC ENERGY POWERS THE FUTURE OF FLEET TRANSPORT FOR BLUE FLAME EMPLOYEES

CLIENT: Blue Flame
LOCATION: Cornwall

LUCECO PROJECT MANAGER: Sarah Cox
DATE: June 2025

WHAT DID SYNC ENERGY DO?

As part of their ongoing commitment to sustainable practices and innovation in energy solutions, award-winning heating and electrical contractors, Blue Flame, has invested in Sync Energy EV charging at the homes of its employees, ensuring a greener transport strategy for its fleet of electric vans.

WHAT PROBLEM DID SYNC ENERGY SOLVE?

Blue Flame's Zach Penna said: "This has been an important next step in our commitment to reducing our carbon footprint. Blue Flame has replaced nearly half of its diesel vans with 100% electric vehicles, significantly cutting emissions.

"Installing EV charging at the homes of our employees has been crucial to ensure both a sustainable and energy efficient fleet operation for the business and the very highest level of service for our customers. We have been really impressed with Sync Energy, their range of products and expert knowledge – they met our requirements at every stage."

WHAT PRODUCTS DID SYNC ENERGY SUPPLY?

Sync Energy's Wall Charger 2 has been installed at the homes of 21 Blue Flame employees, providing them with an easy-to-use, fast and efficient EV charging solution, as well as integrated energy payments direct to their energy providers.

FEATURED PRODUCTS

WALL CHARGER 2
7.4KW SOCKETED

Full Smart functionality via the intuitive, Sync Energy App allows for personalised settings, such as scheduled charging and optimised cut-off points, meaning users can charge dynamically and maximise cheaper rates of electricity.

Along with a charging capacity of up to 7.4KW, with a standard household single-phase electrical supply, the Sync Energy Wall Charger 2 provides flexibility and maximum efficiency.

WHY DID THE CUSTOMER CHOOSE SYNC ENERGY?

Sarah Cox, Sync Energy EVCP Business Development Manager (Southern Region), said: "We worked closely with the wholesalers, Rexel Redruth to quote

and supply the very best solution for Blue Flame, supporting them through technical queries with regards to software integration.

"It was a real pleasure working with Zach Penna from Blue Flame and Nigel Hall at Rexel Redruth on this exciting project. I am looking forward to working with them on future EV projects."
